EXAMINER'S AMENDMENT & STATEMENT OF REASONS FOR ALLOWANCE

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Albert S. Penilla on 02 August 2007.
3. The application has been amended as follows:

3. (Currently amended) An apparatus for generating a fluid meniscus as recited in claim 1, wherein the plurality of discrete conduits enable definition of the fluid meniscus fluid.

Cancel claim 4.

6. (Currently amended) An apparatus for generating a fluid meniscus as recited in claim 3 [[4]], wherein the plurality of discrete conduits include at least one of a first inlet for applying a first fluid to the substrate surface; a second inlet for applying a second fluid to the substrate surface, and an outlet for removing the first fluid and the second fluid from the substrate surface.

33. (Currently amended) The reconfigurable proximity head as recited in claim 31, further comprising,

~~a second~~ an alternate process configuration insert having a third configuration of discrete conduits, wherein the third configuration is different than the second configuration,

wherein the proximity face includes the first configuration and the third configuration when the ~~second~~ alternate process configuration insert replaces another process configuration insert.

Allowable Subject Matter

4. Claims 1-8 & 31-33 are allowed.

5. The following is a statement of reasons for allowance: The closest prior art of record, U.S. Patent No. 6,446,358 to MITSUMORI et al., fails to teach each and every limitation of the instant invention. Specifically, while MITSUMORI et al. discloses an apparatus capable of generating a meniscus, MITSUMORI et al. fails to teach or reasonably suggest the claimed fluid meniscus generating apparatus with a housing surrounding an insert such that the flat surface regions of each together define a proximity face capable of generating a fluid meniscus via discrete conduits extending therethrough to supply process fluid, which is disclosed as an essential element of claimed invention, as described in claims 1 and 31. For at least the foregoing reasons, claims 1-8 & 31-33 are believed to recite patentable subject matter.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
